

## Security. . .for the Sport of Kings

Vigilant provides an enhanced surveillance at a brand new Florida casino

### Gulfstream Race & Casino Resort

Vigilant has provided a future proof IP video surveillance solution for a new gaming hall at Gulfstream Park Casino in Florida. The system which currently “watches over” several hundreds of slot machines, with an unlimited expansion capability.

Gulfstream Park is built on horse racing property. It is a member of Magna Entertainment Corp., North America’s leading owner and operator of horse racetracks and one of the world’s leading suppliers, via simul-casting of live racing content to the growing inter-track, off-track and account wagering markets. Recently gaming, as well as dining and music, have become major factors in Gulfstream’s continued growing success.

### The challenge

Vigilant was asked to specify a CCTV solution that can keep up with the current demands as well as the planned property expansions of the hotel, retail and entertainment complexes. The specifications required providing the ability to record several hundreds of channels, at 4CIF/30 FPS, and at least 30 days of storage around the clock – all in an analogue/IP hybrid environment. In addition, the customer specified an evidence vault to store special events in external storage, and real time streaming over the IP infrastructure.

### Vigilant Solution

The winning solution includes Vigilant IP surveillance system (NetStream & NetStore) combined with the robust DVR system (Elite series) to provide the required hybrid environment. The fact that Vigilant was able to meet the specifications with their proprietary single source end-to-end solution and offer outstanding price performance, ensured them the project.

Working with system integrators IEP Ltd. of Arizona, Vigilant has supplied Gulfstream Park Casino with a totally new and comprehensive system and provided full training of personnel to ensure the customer achieves maximum benefit from the system.

### About Vigilant

Vigilant Technology, a BATM Company, is a global leading provider of intelligent IP surveillance and security solutions. The company offers a turn key solution including video servers, DVR/NVRs, intelligent real-time video content analysis and sophisticated, proactive control center solutions.
