

Gaming Protection...Miles Out to Sea

Sun Cruz Casino

Sun Cruz offers its customers all the facilities and services they could need to make their cruise experience a dream journey. Each of the Sun Cruz vessels is a well equipped casino with several hundreds of slot machines, major table games - such as, Blackjack, Craps, Baccarat and Roulette, as well as restaurants and live entertainment.

With thousands of passengers coming on-board on a weekly basis, security and safety is a key issue and needless to say, a high end security solution was required.

The challenge

Vigilant were set the challenge of designing a video recording and analysis solution that would, on a floating casino, ensure personal security and also maintain the integrity of major gaming tables. Sun Cruz Casinos, which operates a number of casino cruise vessels off the Florida coast, subsequently commissioned Vigilant to work with the chosen system integrator, IEP Ltd. to provide and install an intelligent video event analysis system.

According to Mr. Chris Batog, Corporate Security Technician for Sun Cruz Casinos, they were looking for a stable and reliable enterprise-level digital video recording based solution with live and playback monitoring capabilities via satellite to land. Mr. Chris Batog added: **"The two major factors that helped me decide on Vigilant were reliability and also the amount of advanced features included in the price"**.

Vigilant Solution

Before making the decision to go ahead with the Vigilant solution, Sun Cruz carried out evaluations of alternative systems from a major Japanese manufacturer as well as from local DVR manufacturers. The Vigilant solution - including the Vigilant Elite Digital Video Recorder and Vigilant ViewStation, was seen to be an obvious winner.

"The decision making process lasted only a week," added Mr. Batog, **"The major benefits we have found in the Vigilant solution are reliability and the ability to function smoothly without any delay or technical hitches."**

About Vigilant

Vigilant Technology, a BATM Company, is a global leading provider of intelligent IP surveillance and security solutions. The company offers a turn key solution including video servers, DVR/NVRs, intelligent real-time video content analysis and sophisticated, proactive control center solutions. Vigilant has a worldwide customer base and is globally supporting tens of thousands of cameras in airports, governmental sites, financial institutions, correctional facilities, casinos, city centers, and more.
