

# Tarmac's Durox aircrete manufacturing

# SUCCESS STORY

## Vigilant have won an order to provide an Enterprise video management system for Tarmac's Durox aircrete manufacturing facility at Linford, Essex

The facility, which is part of Tarmac's Top Block division, is the world's largest producer of aircrete blocks at one location and comprises two separate factories.

As specified by Tarmac, the images from 32 cameras located around the site will be recorded at 1/2 frame rate at 4CIF. Vigilant NetView and RemoteView software modules will allow users at five separate locations to have telemetry control of the cameras whilst viewing live images or retrieve pre-recorded video.

The images from the facility's CCTV system will be monitored and recorded for general security purposes. However, the prime objective is to provide management information and ensure that there is full compliance with the company's health and safety procedures. Ian Hayward, Divisional Electrical Engineer for Tarmac said: **"We take the safety of our employees very seriously. That is why we have a set of "Golden Safety Rules" which all our 500 plus manufacturing plants around the world must strictly adhere to. The CCTV system plays an important part ensuring that we do so at Linford."**

Ian invited three different installers to submit proposals to supply the digital recording and video management system and was expecting to buy an "out of the box solution". CCTV specialists Vindex Systems introduced Ian to Vigilant and were able to demonstrate the benefits of an Enterprise system that could be designed and built to a customer's specific requirements.

Ian added: **"When I saw the capabilities of the NetView virtual matrix, I realised that it could give us flexibility and the potential for expansion of the CCTV system that we are likely to require in the future."**

### About Vigilant

Vigilant Technology, a BATM Company, is a global leading provider of intelligent IP surveillance and security solutions. The company offers a turn key solution including video servers, DVR/NVRs, intelligent real-time video content analysis and sophisticated, proactive control center solutions. Vigilant has a worldwide customer base and is globally supporting tens of thousands of cameras in airports, governmental sites, financial institutions, correctional facilities, casinos, city centers, and more.
